RE: Site Inspection, Miracle Rock Mining Co. (David Taylor), Body Tody Mine,  
S/015/040, Emery County, Utah

Date of Inspection: July 27, 1995  
Time of Inspection: 1115  
Conditions: Clear, hot  
Participants: Tony Gallegos, DOGM

Purpose of Inspection: To become familiar with the mine site.

No one was at the mine site during this inspection. There is a locked gate on the access road to the site. Features at the mine site include an ore stockpile located on the southwest end, a fuel tank, several 55-gallon drums, an office or shop type building, the main mine portals and a piece of crushing/sorting equipment.

There is a graded pad area off the side of the access road leading up to the office/shop. There are some supplies(?) stored here. Photographs were taken of the mine site features.

On the way out of town we stopped in the office/mill which is located in the town of Emery. There we met and talked with Mr. Dave Taylor. He explained that in the upcoming weeks they may be submitting a proposal to expand the mine. He also showed us some of the products being made with their ore and explained that most of the crushing/grinding and separating is now done at this office/plant facility.
